

3rd Pan-European Trainees' Congress Moscow 2022 (Virtual Meeting)

Paediatric and adolescent gynaecology (PAG) is a special field in general gynaecology and obstetrics.

Some clinical situations in children and adolescents are rare and the treating physician may not have the appropriate training to deal with the situation. Our aim is to share knowledge, build interdisciplinary bridges, help each other to learn and meet in a relaxed and inspiring environment.

The Congress programme includes scientific lectures by internationally renowned experts, lively discussions with colleagues and workshops on

the topics of the lectures.

EURAPAG
European Association of Paediatric and
Adolescent Gynaecology
